

Docket No. 5037

UNIVERSAL CRIMPING CONNECTOR

Abstract of the Disclosure

5 A coaxial cable TV connector is made up of
one or more crimping members having inner tapered
surface portions which are preassembled onto a
crimpable sleeve member of a connector body, the
sleeve having an external tapered portion into which
the coaxial cable is inserted so that the crimping
10 ring(s) can be preassembled onto the sleeve and
axially advanced to cause inward radial deformation
of the sleeve into sealed engagement with an outer
surface of the coaxial cable, and each size of
connector assembly is conformable for use with more
15 than one size of cable.
